

Stellantis Reports Q3 Net Revenues of €32.6 Billion

Significant Commercial Actions and New Product Launches Mitigated Continued Impact of Semiconductor Shortages Full-Year Guidance Confirmed

- **Consolidated shipments⁽¹⁾ of 1,131 thousand units**, down 27% compared to Q3 2020 Pro Forma⁽²⁾ primarily due to loss of ~30% of Q3 2021 planned production, or ~600 thousand units, due to unfilled semiconductor orders
- **Net revenues of €32.6 billion**, down 14% compared to Q3 2020 Pro Forma⁽²⁾ with improved vehicle mix and positive net pricing more than offset by lower volumes
- **Total new vehicle inventory of 689 thousand units** at September 30, 2021, including Company inventory of 148 thousand units

“Stellantis’ Q3 Net revenues reflect the success of our recent vehicle launches, including new electrified offerings, combined with significant commercial and industrial actions executed by our teams in response to unfilled semiconductor orders. Full year guidance is therefore confirmed despite continued poor visibility of component supply.”

- Richard Palmer, CFO
